

Maths Homework – Silver

Work out the answers to the calculations below using and **showing** the column addition method, then solve the word problems, making sure the answer is clearly presented on the page.

A) $8,273 + 619 =$

B) $6,413 + 2,638 =$

C) $2,648 + 844 =$

D) $4,592 + 2,976 =$

1. Jack has 9,075p and he finds another 876p at the bottom of his bag. How much money does he have altogether?

2. At the concert, there are 2,729 children. There are also 4,514 adults at the concert. How many people are at the concert altogether?

3. In the library, there are 4,735 books. At lunch time, the children return 3,007 books. How many books are in the library after lunch?

CHALLENGE

Can you write your own word problem that would need column addition to solve it?
