

Year 4 Homework 25.11.22

This week we started looking at different animals that live in and around rivers in the UK. We looked at the following animals:

Pike	Carp	Roach	Bream
Barbel	Chub	Mute swan	Mallard duck
Kingfisher	Heron	Cormorant	Otter
Water vole	Bats	Frog	Newt
Toad	Dragonfly		

For homework, there are two options:

1. Go on a river walk

If you are lucky enough to have time at the weekend (and the weather is nice), go on a walk along the River Severn. How many of these animals can you spot? See if you can take some photos! When you come back, research some of the animals you saw and make notes them in your books. If you're really lucky, you might be able to go down to Diglis and have a look at the new Diglis Fish Pass!

2. Choose some of these animals and research them.

When you are researching make sure you find out:

- What type of animal it is (bird, mammal etc.)
- Whether it is a carnivore, herbivore or omnivore.
- What it eats
- Any other fun facts you find!

You will use your research in lesson time over the next few weeks.
