

## Year 4 Geography Homework 14.07.23

In Geography lessons this week we have looked at different regions of the UK. Children are currently completing a project where they are comparing two different regions of England. They have already completed research about the West Midlands region. For homework, we would like children to research the South West region.

Children should research:

- Human features (man made)
- Physical features (natural features)
- Population
- Urban/rural landscapes
- Beaches/seas
- Rivers
- Terrain e.g. hills etc.

In school, they will create Powerpoint slides with their partner about the South West and will have to compare it geographically to the West Midlands.
