Green Flag 2026

Lyppard Grange Primary School

Award Level:
Distinction

Focus Topics:

Your Greatest Overall Success:

Languages Day helping you all feel more connected to your diverse school community! Finding out about the environments that we each come from can help us develop our empathy and understanding of the wider world and communities outside of our immediate view! We are so glad to hear that Global Citizenship has become such an important part of your school culture now.

We Also Loved:

- What an amazing accomplishment in completing a field study to find out where would be best to install solar panels! Well done all involved! Solar panels are, as you know, a sustainable form of energy, and therefore will not only help save your school money but also drastically reduce air and water pollution, conserve billions of gallons of water annually by eliminating the need for cooling at traditional power plants, AND help mitigate climate change!
- Taking lessons outdoors! What a great way to not only enjoy the sunshine whilst learning but also saving lots of energy by turning off screens and lights in the school building! Up to 30% of energy is wasted in schools across the UK, so you are all helping to reduce the greenhouse gas emissions and pollution!
- A Whole School Community Liter Pick in March! Over 2 million pieces of litter are discarded daily, and you guys are helping to show that people DO care about our beautiful environment and will stand up to litter bugs!
- Pushing past the barrier of eco-friendly glitter costing more by persuading your head teacher to buy less for the same price as the plastic glitter and taking a pledge to use the eco-friendly glitter economically so that everybody can enjoy it! Well done to the Eco-Committee for agreeing to educate the rest of the school community in September, we wish you the best of luck in this brave and powerful endeavour!
- A grant of £1,750 that was used to purchase a new bike rack! This is amazing and will encourage more young people and staff to cycle and scooter to school! As well as being great for physical and mental wellbeing, it also greatly reduced your schools carbon footprint when you don't come to school in a car or bus that emits pollutants!
- Lastly, what an awesome Eco-Code poster! We love the eye-catching colours and more importantly the strong and clear message that you are sending to your school community, illustrating honestly the impact our actions have on the environment as a human race!

Next Year, Why Not Try...

To further aid your brilliant battle to stop microplastics and save our marine life, why not collect all of your recycling from your litter picks to use for a mural that can be seen and appreciated by your school community! Bottle caps, crushed cans, as well as non-recyclable materials like crip packets can be reused to create awesome art! We know how skilled you guys are with your creativity and innovation, we would love to see some art made sustainably!
